

# Dennis Conner's North Cove Wireless Internet

To help you access the internet and your email, Dennis Conner's North Cove offers Wireless G access.

The cost is \$4.50 per day or \$60 per month per MAC address.

Your MAC address is the unique 12 digit code which identifies your wireless card or antenna.

Only registered MAC addresses are able to log onto the North Cove Wireless G router.

This is how you can determine your MAC address:

For WINDOWS XP:

- Click the Start Button and Click Run.
- Type in the word **command**
- A black box will appear. Type in **ipconfig /all** (with a space between the g and the /).
- Your Physical Address is your MAC address

For Macintosh (OS X):

- From the dock, select "System Preferences".
- Select the "Network" Pane
- With the TCP/IP tab selected, the number next to Ethernet Address is you MAC address

To activate your wireless access, first view your available wireless networks and see that you can read the "North Cove" signal. Then fill out this form and give it to Marina Manager Ken Gross. Ken will enter your MAC address into our router and then you will be able to communicate with it.
